## Ocean Acoustics

Fall 2019

Dr. Len Zedel, room C-4066

### Evaluation Scheme

Assignments (3)	45%
Class Presentations	30%
Final Exam	25%

**Assignments** will be standard multi-question assignments based on material presented or discussed in class. There will be three assignments.

**Class Presentations** lecture material in this course will be shared between students and the instructor and will consist of basic background material (that will be provided) and on classic journal papers or recent topical papers in ocean acoustics. Standard lectures will provide background information needed to understand the journal papers and the assignments will be tuned to follow up on both lecture and journal material.

The **Final Exam** will be set for three hours and will be based on course assignments and reviewed journal papers.
